Bartłomiej Rasztabiga

Senior Software Engineer

Senior Software Engineer specializing in distributed systems and event-driven architecture, with 6+ years in fintech and HR tech. Built and led end-to-end delivery of cloud-native systems at scale, eventually taking on Technical Lead ownership of architecture and technical direction. Currently applying LLM-based agents to automate workflows and enhance product capabilities.

Work History

2022-01 - present

Senior Software Engineer

symmetrical.ai, Warsaw, Poland

- Built HRIS and Payroll platform from 0 to 173 enterprise clients and 2,124 MAU on a distributed system of 33 microservices processing 17.6M requests/month, at a startup backed by $18.5M Series A funding.
- Navigated two major product pivots, maintaining system stability and team alignment throughout.
- Took leadership of several technical initiatives and team deliveries, eventually assuming end-to-end ownership as Technical Lead of a 6-person engineering team, overseeing architecture, delivery, and technical direction.
- Introduced LLM-based agents to automate internal workflows and enhance product capabilities.

Tech stack: Kotlin, Spring Boot, MongoDB, Apache Kafka, Kubernetes, AWS, TypeScript, React.js, Mastra

2021-07 - 2022-01

Software Engineer

Sollers Consulting, Warsaw, Poland

Developed new features for the internal HRIS platform used daily by 1000+ Sollers employees, working on both backend and frontend layers.
Tech stack: Java, Spring Boot, PostgreSQL, React.js, TypeScript

2020-07 - 2021-07

Software Engineer

Ignite Software Development, Remote

- Led a team of engineers to deliver a SaaS financial reporting platform, reducing report generation time by 60%.
- Additionally, provided consulting support for enterprise clients integrating and customizing solutions on the Salesforce CPQ platform.

Tech stack: Kotlin, Spring Boot, PostgreSQL, Kubernetes, Google Cloud Platform

Education

2024-02 - 2026-09

Computer Science, Master's degree

Warsaw University of Technology

Thesis: Application of large language models (LLMs) for generating Docker and Kubernetes configurations

I also consent to processing of my personal data by **(XYZ)** for the purposes of any future recruitment processes.

2020-10
- 2024-02

Computer Science, Bachelor's degree

Warsaw University of Technology

Thesis: Application of microservice architectures in creating scalable web applications

Volunteering

2017-12
- 2021-09

OpenMRS Contributor

Contributed to the OpenMRS platform by implementing core features and reviewing community pull requests. Helped improve healthcare access in under-resourced regions through open-source technology.

Awards

2022-04

Hackathon BEST Hacking League 7 Winner

2018-06

Hackathon Idea Kielce 2018 Winner

2018-01

Google Code-in 2017 Winner (OpenMRS organization)
