BartlomiejRasztabiga

bartlomiej-rasztabiga

Senior Software Engineer specializing in distributed systems and event-driven architecture, with 6+ years in fintech and HR tech. Built and led end-to-end delivery of cloud-native systems at scale, eventually taking on Technical Lead ownership of architecture and technical direction. Currently applying LLM-based agents to automate workflows and enhance product capabilities.

WORK HISTORY

Forward Deployed Engineer

Wonderful

Jul 2026 – Present

Remote

- Embedded in enterprise client environments, taking technical ownership of AI agent deployments end-to-end – from integration design through production rollout across complex enterprise systems.

Tech stack: Go, TypeScript, React.js, AWS, GCP, AI agents, LLM integrations

Senior Software Engineer

symmetrical.ai

Jan 2022 – Jun 2026

Warsaw, Poland

- Built HRIS and Payroll platform from 0 to 173 enterprise clients and 2,124 MAU on a distributed system of 33 microservices processing 17.6M requests/month, at a startup backed by \$18.5M Series A funding.
- Navigated two major product pivots, maintaining system stability and team alignment throughout.
- Took leadership of several technical initiatives and team deliveries, eventually assuming end-to-end ownership as Technical Lead of a 6-person engineering team, overseeing architecture, delivery, and technical direction.
- Introduced LLM-based agents to automate internal workflows and enhance product capabilities.

Tech stack: Kotlin, Spring Boot, MongoDB, Apache Kafka, Kubernetes, AWS, TypeScript, React.js, Mastra

Software Engineer

Sollers Consulting

Jul 2021 – Dec 2021

Warsaw, Poland

- Developed new features for the internal HRIS platform used daily by 1,000+ Sollers employees, working on both backend and front-end layers.

Tech stack: Java, Spring Boot, PostgreSQL, React.js, TypeScript

Freelance Software Engineer

Jul 2020 – Jun 2021

Remote

- Worked as an independent software engineer, delivering client projects remotely.

SKILLS

Languages

Kotlin Java Python TypeScript

Frameworks & Libraries

Spring Boot FastAPI React.js GraphQL

Databases & Infrastructure

MongoDB PostgreSQL Kafka Kubernetes

AWS Qdrant

Architecture

DDD Hexagonal Architecture

Distributed Systems CQRS

Event Sourcing

AI & Machine Learning

AI agents RAG LLM integrations

Mastra

LANGUAGES

English – C1 Advanced
(EF SET 75/100)

AWARDS

Hackathon BEST Hacking League 7 – Winner April 2022

Google Summer of Code 2021 – Contributor (OpenMRS) August 2021 · link

Hackathon Idea Kielce 2018 – Winner June 2018 · link

Google Code-in 2017 – Winner January 2018 · link

- Built Ethereum smart contracts and delivered Web3 applications, including an online game, an ERC-20 token exchange, and an ERC-20 token airdrop platform.
- Provided Solidity consulting, with a focus on smart contract design, security, implementation, and review.

Tech stack: Solidity, Express.js, TypeScript, React.js, Web3 technologies

WORK HISTORY

Software Engineer

Ignite Software Development

📅 Jul 2019 – Jul 2020

📍 Remote

- Led a team of engineers to deliver a SaaS financial reporting platform, reducing report generation time by 60%.
- Additionally, provided consulting support for enterprise clients integrating and customizing solutions on the Salesforce CPQ platform.

Tech stack: Kotlin, Spring Boot, PostgreSQL, Kubernetes, Google Cloud Platform

IoT Engineer Intern

Transition Technologies PSC Sp. z o.o.

📅 Jul 2017 – Aug 2017

📍 Kielce, Poland

- Built a C++ framework for the ESP8266 platform that streamlined development of IoT devices and accelerated prototyping of sensor and actuator modules.

Tech stack: C++, Arduino Framework

EDUCATION

Computer Science, Master's Degree

Warsaw University of Technology

📅 Feb 2024 – Sep 2026

Specialization: Intelligent Systems

Thesis: Application of large language models (LLMs) for generating Docker and Kubernetes configurations · [link](#)

Computer Science, Bachelor's Degree

Warsaw University of Technology

📅 Oct 2020 – Feb 2024

Specialization: Software Engineering

Thesis: Application of microservice architectures in creating scalable web applications · [link](#)

CERTIFICATES

AI_devs 3 – Agents Reloaded

June 2025 · [link](#)

Completed a comprehensive AI engineering program focused on practical applications of large language models (LLMs), including RAG pipelines, agents, and fine-tuning techniques.

EF SET English Certificate 75/100 (C2 Proficient)

January 2018 · [link](#)

OPEN SOURCE

OpenMRS Contributor

📅 Nov 2017 – Aug 2021

Contributed to the OpenMRS platform by implementing core features and reviewing community pull requests. Helped improve healthcare access in under-resourced regions through open-source technology.
